PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building and maintaining scalable web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **JavaScript (ES6+)**. Currently developing **ERP (Enterprise Resource Planning)** modules, **RESTful APIs**, and frontend–backend integrations that support business workflows and data management. Skilled in **Redux Toolkit** state management, responsive UI development with **Tailwind CSS**, **JWT authentication**, **Role-Based Access Control (RBAC)**, MongoDB schema design, third-party API integration, and **Git** version control. Strong foundation in **Data Structures and Algorithms**, **Object-Oriented Programming (OOP)**, and the **Software Development Life Cycle (SDLC)**, using AI-assisted development tools to deliver clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3

Frontend Development: React.js, JSX, React Router, Tailwind CSS, Responsive Web Design, Component-Based Architecture, Single Page Applications (SPA)

State Management: Redux Toolkit, React-Redux, Context API, React Hooks

Backend Development: Node.js, Express.js, RESTful API Design & Development, Middleware, Third-Party API Integration, JSON Web Tokens (JWT), Authentication & Authorization, Role-Based Access Control (RBAC)

Databases: MongoDB, SQL, DBMS, Database Schema Design, CRUD Operations

Tools & Platforms: Git, GitHub, Postman, VS Code, Axios, Vite

AI-Assisted Development: Claude, ChatGPT, Prompt Engineering, AI-Assisted Coding, Debugging & Code Review

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

Ruhanix OPC Private Limited — *Full Stack Developer* **Apr 2026 – Present**

- Develop and maintain **ERP (Enterprise Resource Planning)** modules that streamline business workflows, operational processes, and data management for end users.
- Build and integrate **RESTful APIs** with **Node.js** and **Express.js**, connecting **React.js** frontend interfaces with backend services to ensure reliable, consistent data flow.
- Implement new application features and reusable components end to end, following clean code practices to improve **code maintainability** and **scalability**.
- Troubleshoot, debug, and resolve application issues, and improve existing workflows and system functionality; collaborate on feature implementation and maintenance using **Git** version control.

Sheryians Coding School — *Web Developer Intern* **Dec 2025 – Feb 2026**

- Developed reusable, modular **React.js** components and responsive, mobile-first user interfaces using **Tailwind CSS**.
- Built and integrated backend endpoints with **Node.js** and **Express.js** to power dynamic, data-driven web functionality.
- Created technical content on web development and programming fundamentals, translating complex concepts into clear, accessible material and supporting UI improvements focused on usability.

PROJECTS

Learning Management System (LMS) — Full-Stack MERN Application

Tech Stack: MongoDB, Express.js, React.js, Node.js, RESTful APIs, JWT, RBAC

- Engineered a full-stack **MERN** learning platform enabling instructors to create and manage courses and students to enroll, purchase, and stream course content.
- Implemented secure **JWT-based authentication** and **Role-Based Access Control (RBAC)** to enforce distinct student and instructor permissions and protect API routes.
- Designed **MongoDB** schemas for course data and developed **RESTful APIs** integrated with React.js to power course management, purchasing, and streaming.

MovieThrill — Movie Discovery Web Application

Tech Stack: React.js, Redux Toolkit, React-Redux, Tailwind CSS, Axios, TMDB API

- Built a responsive movie discovery **Single Page Application (SPA)** in **React.js**, integrating **The Movie Database (TMDB) REST API** to fetch and display movie data.
- Implemented centralized global state management with **Redux Toolkit** and **React-Redux**, reducing prop drilling and keeping data consistent across components.
- Handled asynchronous API requests with **Axios** and built a modular, component-based UI with **Tailwind CSS** to improve maintainability and speed up feature development.

EDUCATION

Graphic Era Deemed to be University — Master of Computer Applications (MCA) **Pursuing**

Graphic Era Hill University, Haldwani — Bachelor of Computer Applications (BCA) | CGPA: 9.0/10.0 **Aug 2023 – May 2026**

The Master's Sr. Sec. School — Class XII (CBSE): 89.2% | Class X (CBSE): 92.2% **2023 | 2021**
